

Select **Tools** from your Internet Explorer, then select **Internet Options**.

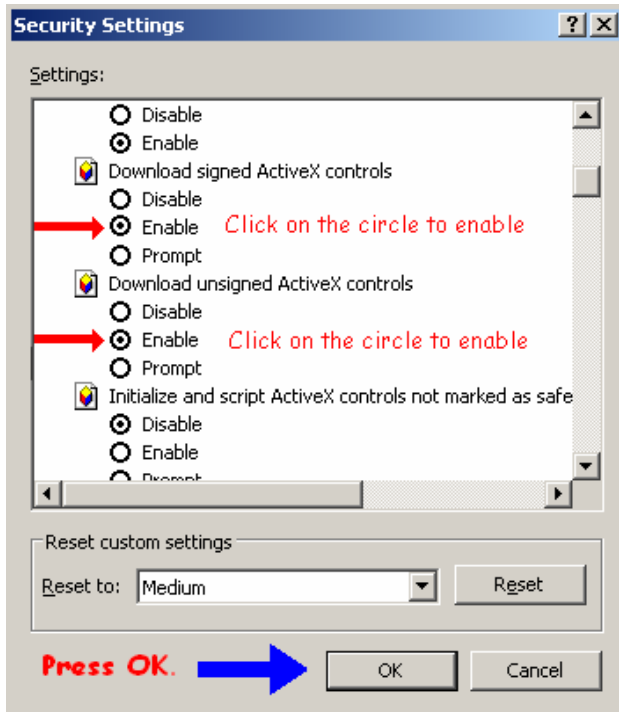

Click on the **Security** tab, in the **Internet Options** window.

Next, press the **Custom Level** button.

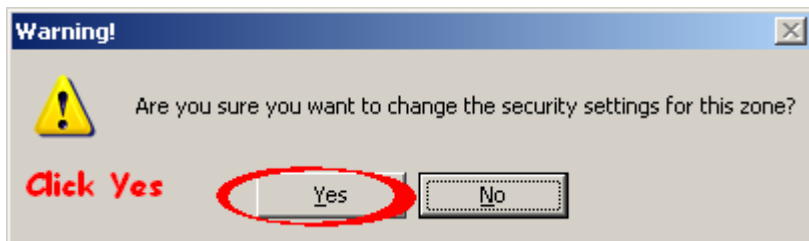

Scroll a little until you see the highlighted text, **ActiveX Controls and plug-ins** and **ENABLE** the **Automatic prompting for ActiveX controls**.

Scroll a little bit further where you will see **Download signed ActiveX controls** and click to **ENABLE**.

And right under the "Download signed ActiveX controls" you will see **Download unsigned ActiveX controls** where you will click on the circle beside **Enable**.

Then, Press **OK**.

A smaller window pops up, be certain to click "Yes" to save the settings you have made to your computer.

Finally!!!!!! ONE MORE click!!!!
On **OK** and you are done!
