DEADLINES FOR 2012 APPLICANTS

MCAT registration and test dates are posted on the MCAT Web site: www.aamc.org/students/mcat/.

June 1, 2011
Applicants may begin to submit their AMCAS web-application to AAMC.

July 15, 2011
Arkansas residents may begin calling to schedule their faculty interview. Applicants must certify and submit the AMCAS application before scheduling an interview.

November 1, 2011
Final deadline for all applicants to submit AMCAS web-application to AMCAS.

December 10, 2011
Non-Arkansas residents with strong ties to Arkansas must submit letter to UAMS advocating strong ties.

December 15, 2011
Admissions Committee meets to determine which non-Arkansas resident applicants will be invited to come for faculty interviews on January 7.

January 20, 2012
Letters to early accepts for Arkansas residents.

February 20, 2012
Letters mailed to all applicants informing them of their admissions status: Accepted, Alternate List or Not Accepted.

FACULTY INTERVIEWS

Arkansas Residents
Arkansas residents must be interviewed by members of the UAMS faculty. It is your responsibility to call the Office of Admissions to schedule your faculty interview after you have certified and submitted your AMCAS application. You may begin calling July 15, but you must call no later than November 1 to schedule your interview.

Non-Arkansas Residents
Non-Arkansas residents will be interviewed by invitation only. The Admissions Committee will meet in mid-December to determine which non-Arkansas resident applicants will be invited to come for faculty interviews on January 7.
Admissions Requirements

**PERSONAL ATTRIBUTES**

Certain personal qualities are of fundamental importance in the character of one who will enter the medical profession. These attributes include curiosity, compassion, integrity, stamina, dedication to service and a sustained ability to learn. Beyond these are the cognitive needs and requirements of an adequate intellectual capacity.

The paramount goals of the premedical experience should be mastery of the art of study and the intellectual maturity to understand, utilize and synthesize facts into concepts. The student must have the ability to absorb, integrate and use a large body of knowledge. Likewise, future physicians must understand the socio-cultural and environmental factors in illness and the impact of illness on the family and greater community. The premedical education contributes significantly to the interaction of these factors.

**ACADEMIC REQUIREMENTS**

A baccalaureate degree is strongly recommended. In fact, 100% of applicants accepted for admission to the 2011 freshman class had at least a bachelor’s degree. Applicants must take the MCAT. MCAT scores obtained prior to 2009 are not acceptable for applicants to the 2012 first-year class. The MCAT test dates for calendar year 2011 are posted on the MCAT Web site. Applicants must register for the MCAT at www.aamc.org/students/mcat/. Applicants with premedical majors have no particular advantage over applicants majoring in other fields. Successful applicants, however, will be highly motivated individuals with a solid foundation in the natural sciences.

**PRE-MATRICULATION REQUIREMENTS**

Accepted applicants must have successfully completed the following courses prior to matriculation in the College of Medicine:

- Two semesters of Biology
- Two semesters of Chemistry
- Two semesters of Organic Chemistry (labs required beginning in 2012)
- One semester of Genetics beginning in 2013
- Two semesters of Math, or through Calculus I
- Two semesters of Physics
- Two semesters of English

These are the minimum courses required. Applicants are strongly encouraged to take more advanced-level courses. AP credit may be used to satisfy pre-matriculation course requirements.

**RESIDENCY REQUIREMENTS**

Preference is given to Arkansas residents. However, state law permits the Admissions Committee to accept a limited number of non-Arkansas residents, provided no qualified resident applicant is displaced. Non-Arkansas residents with at least a 3.6 GPA and an average of 9 on each section of the MCAT are encouraged to apply. Non-Arkansas residents with strong ties to Arkansas are given preference. Individuals with strong ties should communicate this information to the Office of Admissions by November 1. An applicant must be a U.S. citizen or a legal permanent resident.

The following guidelines for determining Arkansas resident status have been established and must be verified by the Office of the Vice Chancellor for Academic Affairs. The applicant must have a domicile in the state of Arkansas for a period of six consecutive months in a nonstudent status immediately prior to the consideration of an application. An applicant must take steps that would support intent to become a resident: voter registration, automobile registration, state driver's license, paying state taxes, etc. Fulfilling one or more of these does not necessarily guarantee residency. Individuals who have already established residency may be temporarily absent from home to attend school or for service in the Armed Forces. An out-of-state student who merely lives in Arkansas while attending school cannot use this in-school period to fulfill residency requirements.

**FINANCIAL AID**

The decision to pursue a medical education should involve careful planning in a number of areas. A part of that planning should include a thorough investigation into the financial aspects of obtaining a medical education. Medical school is expensive and requires a great deal of time, making it highly unfeasible for students to work while enrolled. However, enough financial aid is available in the form of scholarships and loans to cover tuition and fees plus a reasonable amount for living expenses.

If you wish to apply for financial aid, go to www.uams.edu/studentfinancialservices.

**APPLICATION PROCEDURES**

The College of Medicine participates in the American Medical College Application Service (AMCAS) sponsored by the Association of American Medical Colleges. Applicants must use the AAMC online web-application at www.aamc.org. Applicants may certify and submit their completed AMCAS web-application to the AAMC beginning in June.

The deadline for submitting your application to AMCAS is November 1 for the class entering the following fall. Official transcripts should be sent directly to AMCAS from the registrar of each college attended. AMCAS will send your MCAT scores to us. Recommendations from your Premedical Advisory Committee are required and must be sent directly to the Office of Student Admissions. Your application will not be reviewed if you miss your school’s Premedical Advisory Committee’s deadline and we are advised that a letter is not forthcoming.

Note: If your institution does not have a Premedical Advisory Committee, or it has been more than two years since you last attended/graduated from your school, you may choose to have three faculty members submit individual letters of recommendation. In addition to the required Premedical Advisory Committee composite evaluation or three academic letters of recommendation from faculty, you also have the option to ask three individuals to submit personal letters of recommendation, which can further address your qualifications outside the classroom. UAMS College of Medicine utilizes the AMCAS Letters Service for letter submissions. Letters of recommendations should be submitted by November 15.

A nonrefundable application fee of $100 is required from each applicant and should be mailed directly to the Admissions Office.

The College of Medicine, in conjunction with AMCAS, will conduct a criminal background check on all applicants accepted for admission and alternates placed on the alternate list.
