How to Set up UAMS Email on an IPhone

Note: For this guide, we will be using the IPhone 3G as a reference.

1. On your IPhone home screen, click the “Settings” application

2. Once in the Settings tab, click the “Mail, Contacts, Calendars” link.
3. Click “Add Account”.

4. Click “Microsoft Exchange”
5. Next, fill out the requested information as shown below, then click next

1. Your UAMS Email: Ex: lastnamefirstname.ml@uams.edu
2. Domain: UAMS
3. Your UAMS Student ID or Username: Ex: Student – 1005555 Staff/Faculty – millervictorial
4. Your UAMS Network Password (the same one you use to log into the computers on campus)
5. Description Ex: anything to show you what the email account is Ex: UAMS
6. Click “Next”

6. Next, you will be asked to specify the server name. Type webmail.uams.edu

7. Click “Next”
8. Choose what you would like to synchronize to your phone and click “Save”

9. Once it VERIFIES connection, power off your cell phone completely.

10. When turned back on, you will be prompted to give a password. This is required to be on your phone while connected to the UAMS Email network.

   NOTE: If you already have a password application on your phone, it should detect and use it.

11. Once the password is listed, you will see a similar screen any time you try to open your phone.
