Step by Step: Adding StudyMate Class to a Course

Instructors can add StudyMate Class to their course to give students or teams the ability to develop their own interactive (and mobile-friendly) study materials, such as FlashCard activities or practice quizzes. StudyMate class is available inside a Blackboard course – no software download is needed.

1. Confirm that Edit Mode is ON inside your course.

2. On the content page where students should access StudyMate Class, click the Tools button and select StudyMate Class.

3. The Add StudyMate Class page displays. Enter or select the information below. Click the explain link for more information.
   a) Project Title
   b) Type of Project
   c) Editing Rights

4. Click the Submit button.
Step by Step: Adding StudyMate Class to a Course

5. A Success page will display indicating the “StudyMate Class content has been created.”

Click the OK button at the lower right.

6. The StudyMate Class activity appears at the bottom of the content page.

Students will click on the Select this item link to start building their activity.

7. Inside the activity, click the Resources tab for information about the types of possible activities and help in building them.
