Step by Step: Adding A YouTube Video

Instructors can easily add a YouTube video to their course using the built-in search tool.

1. Confirm that **Edit Mode** is **ON**.

2. On the content page, click the **Build Content** button and on the **Mashups** section, click the **YouTube Video** link.

3. A search engine displays where you enter keywords and designate the language.

4. A list of videos appear. Click the **Preview** button to watch a selected video.
5. A larger pop-up video window appears. After you have previewed the video, close the window.

6. Click the Select button to insert it into your page.

7. A Create Mashup Item page displays where you add:
   • The Name of the video that displays to the students.
   • A Description, if desired.
8. Select **Mashup Options**:
   - **View** – The video can display as a small thumbnail on the page, a text link with player, or as an embedded video (player inserted right into page.)
   - You can select **Show YouTube URL** and/or **Show YouTube information**.

9. Under **Attach or Link Content**, browse to attach a file below the video.

10. In the **Options** section, set if and when students can view the video.

11. Click the **Submit** button.

12. The video displays at the bottom of the content page. Use the **up/down arrows** to reposition it on the page, if desired.
