Step by Step: Adding A Divider On The Course Menu

You can add lines to the course menu that divide or separate links to content, folders, or tools. In the example at right, a divider was added to draw attention to the Mid-Term Exam and its date.

1. Open the course and be sure Edit Mode is ON.

2. On the Course Menu, click on the +.

3. Click the Create Divider link in the drop-down menu.

4. The divider line appears at the bottom of the course menu.

   Roll the mouse over the line and click the up/down arrows to reposition the divider line in the course menu.
