Deleting A Link On The Course Menu

To create a user-friendly course, you will want to delete any unused areas, folders, or tools that appear on the course menu. Deleting the link will delete any related content area. You may prefer to hide it, instead of deleting it.

1. Open the course and be sure Edit Mode is ON.

2. On the Course Menu, go to the unused area, folder, or tool and click its action link.

   A drop-down menu displays the Rename Link, Hide Link, and Delete options.

3. Click the Delete option.

4. A pop-up window confirms that you want to delete it. Click OK if you want to delete it or Cancel to return and hide it instead.

   If you selected OK, the link is deleted from the Course Menu.
