Step by Step: Setting the Course Entry Point

In Blackboard Learn, any item on the course menu can be set as the course entry point, which is the first page students see each time they enter the course.

1. To set an item on the course menu as the course entry point, go to the Control Panel and click the Customization link.

2. Click the Teaching Style link.

3. On the Teaching Style page, go to the Select Course Entry Point section. Click the drop down list. All items that appear on the course menu will be in the list.

4. Click on the desired page.

5. Click the Submit button at the bottom right of the page.
