Step by Step: Showing/Hiding A Link On The Course Menu

In Blackboard Learn, you can show/hide or delete a link you have added to the course menu. The process is the same for each editing option.

1. Open the course and be sure **Edit Mode** is **ON**.

2. On the Course Menu, roll over the item and click its action link. A drop-down menu displays listing **Rename Link**, **Hide Link**, and **Delete** options.

3. The item is currently showing. To hide it, click on **Hide Link**.

4. The item is now hidden with the hidden symbol appearing next to it. It will not be visible to the student.

5. To make the item visible again, simply rollover it and click its action link. Click on **Show Link** in the drop-down menu.
