WIMBA CLASSROOM FAQ:  What are target frames?

What are target frames?

When uploading content into your Wimba Classroom you are asked to select where you want that content displayed once you click on it. These areas are known as target frames.

A. Content Frame - Main focus of the presentation. Most content will be targeted in this area. *For display only. No interaction.*

B. eBoard - displays within the Content Frame and is the best place to target Powerpoint slides. *Use the eBoard tools to draw and type text on your slides.*

C. New Window A/B - Opens a new window on the users desktop. Best place to target websites and links to videos. *Give good verbal navigation when targeting new windows.*

D. Branding Frame - For targeting your photo or a logo.

*Click to visit tutorial section: Adding your picture to the branding frame.*
