Rural Hospital Program Progress Report

Reporting Period: January 1, 2009 - June 30, 2009

The Rural Hospital Program Progress Report lists the accomplishments and services delivered in the time period January 1, 2009 through June 30, 2009. The Rural Hospital Program staff coordinated and facilitated the delivery of services to affiliated hospitals and clinics throughout the state during this period. Faculty and staff at UAMS, Arkansas Children's Hospital, UALR, and other state agencies participated in presenting classes, workshops, and clinical services. The majority of these services were delivered by interactive video. During this period a total of 1,114 services were delivered, with a total of 3,290 persons touched by these services.

The services listed in this report fall into several general categories. The first section includes staff development classes as well as administrative and information consultations. Health Education for the Consumer includes classes for adult consumers. Telehealth consultations bring specialty medical services to rural areas.

The chart on page 16 details services that have been delivered in the various categories. Grants/Publications/Research includes assistance with grant writing, editing and notification of potential grant funding sources, research and health information surveys, as well as publications in national journals. Clinical Patient Care/Teaching involves both on-site and telemedical consultations in a variety of specialty areas. Consumer education includes all education programs designed for the public, and Staff Development/Continuing Education includes education for physicians, nurses, and other healthcare providers.

The Rural Hospital Program also provides continuing education credit via the web. During this period 33 persons accessed a total of 27 online programs, receiving 37 hours of continuing education.

Staff Development, Administrative, and Information Consultations

Date	Program Description	Inter-active (y/n)	# of sites	# Attending	Aver. Evaluation score Out of 5
